OPTIMIZING BATTERY PACKS

EMPOWERING PERFORMANCE

bpXcite-s

Mobile Phone Sticker

Battery performance lasts longer, approx. 10-15%

Effect:

The battery pack power harmonises energy oscillations.

When interacting with human energy fields, battery power neutralises the reciprocal effect that the energy oscillations have on the human body.

There is no impact on the receive signal. Only the reciprocal effect on the human biological cells is being altered through the battery power.

A side effect of the harmonisation is that the battery of the mobile phone lasts longer and that the battery charging time shortens.

bpXcite-s

The bpXcite-s sticker can be used for other radiation-emitting devices as well as (PC, notebook, tablet computer, monitor...).

bpXcite-s

Mobile Phone Sticker

HUMAN BODY EFFECT

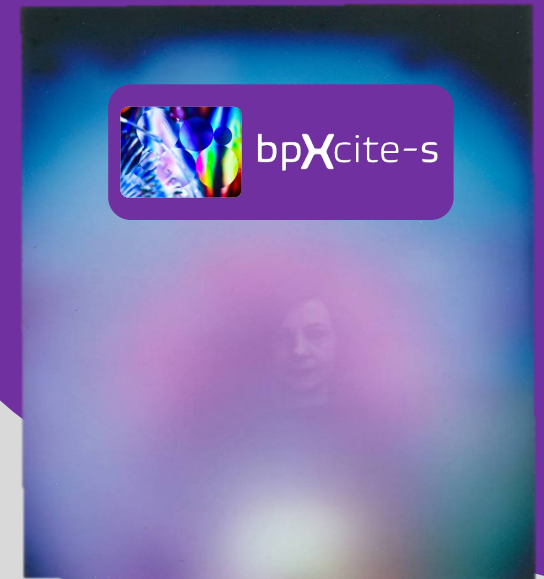

A ECOPower customer made an Aura analysis without (left) and with pbXcite-s sticker (right).

You can see in the left picture energy holes and in the right full energy.

Aura specialist say, this shows the positive effect for the human body clearly.

ENHANCEMENT

Product ID: 100320
+80°C - 30°C
Made in EU

ECOPower PUBLIC

bpXcite-m

Improves the performance of
middle size batteries approx 10-15%

ECO Power solutions
gmbh

Effect:

The **bpXcite-m** sticker changes energy oscillations. This leads to an energy coupling and improves the discharge- and charging time of batteries.

Improves the performance of middle size batteries approx 10-15%

Application:

Put the **bpXcite-m** sticker anywhere on a clean surface on the battery. After approx 8 battery charges the maximum effect is reached. Please make sure, that the surface of the battery is clean and that the **bpXcite** sticker is not bent. Use it for: ebikes (1 sticker)
